

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 70

Contents

S. AHMED and M. H. BACK (Ottawa, Canada) and J. M. ROSCOE (Nova Scotia, Canada)	
A Kinetic Model for the Low Temperature Oxidation of Carbon: I	1
K. E. RITRIEVI, J. P. LONGWELL, and A. F. SAROFIM (Cambridge, MA)	
The Effects of Ferrocene Addition on Soot Particle Inception and Growth in	
Premixed Ethylene Flames	17
M. A. DELICHTSIOS (Norwood, MA)	
Air Entrainment into Buoyant Jet Flames and Pool Fires	33
M. MIZOMOTO and H. YISHIDA (Yokohama, Japan)	
Effects of Lewis Number on the Burning Intensity of Bunsen Flames	47
PIER K. TANG (Los Alamos, NM)	
A Numerical Investigation of High-Explosive Grain Size Effects on the Performance	
of Boosters	61
SAEED T. DARIAN and MARCEL VANPEE (Amherst, MA)	
A Spectroscopic Study of the Premixed Acetylene-Nitrous Oxide Flame	65
K. MATSUI and H. TSUJI (Tokyo, Japan)	
An Aerothermochemical Analysis of Solid Carbon Combustion in the Stagnation Flow	
Accompanied by Homogeneous CO Oxidation	79
GEORGE KOSALY (Seattle, WA) and PEYMAN GIVI (Kent, WA)	
Modeling of Turbulent Molecular Mixing	101
Brief Communication	
R. J. ROBY and C. T. BOWMAN (Stanford, CA)	
Formation of N ₂ O in Laminar, Premixed, Fuel-Rich Flames	119
Book Review	
	125

E. M. BULEWICZ (Cracow, Poland) and B. J. KUCNEROWICZ-POLAK (Warsaw, Poland)	
The Action of Sodium Bicarbonate and of Silica Powder on Upward Propagating Flame	
in a Vertical Duct	127
AMABLE LIÑÁN and PAUL CLAVIN (Marseille, France)	
Premixed Flames with Nonbranching Chain-Reactions (Structure and Dynamics)	137
S. L. OLSON and J. S. T'IEN (Cleveland, OH)	
A Theoretical Analysis of the Extinction Limits of a Methane-Air Opposed-Jet Diffusion Flame	161
WALTER H. BECK (Adelaide, South Australia)	
Pyrolysis Studies of Polymeric Materials Used as Binders in Composite Propellants: A Review	171
ROLAND V. SIEMONS (Enschede, the Netherlands)	
The Mechanism of Char Ignition in Fluidized Bed Combustors	191
H. N. PRESLES, D. DESBORDES, and P. BAUER (Poitiers, France)	
An Optical Method for the Study of the Detonation Front Structure in Gaseous	
Explosive Mixtures	207
AKIRA OBUCHI, AKIHIKI OHI, HYOGORO AOYAMA, and HIDEO OHUCHI (Ibaraki, Japan)	
Evaluation of Gaseous and Particulate Emission Characteristics of a Single Cylinder	
Diesel Engine	215
A. GOMEZ, M. G. LITTMAN, and I. GLASSMAN (Princeton, NJ)	
Comparative Study of Soot Formation on the Centerline of Axisymmetric Laminar	
Diffusion Flames: Fuel and Temperature Effects	225
Brief Communication	
D. DUROX and R. PRUD'HOMME (Meudon, France)	
Polyhedral Flames of Propane at Low Pressure	243
Book Review	
	251

WEIBIAO FU, YANPING ZHANG, HONGQIAO HAN, and YUNING DUAN (Beijing, China)	
A Study on Devolatilization of Large Coal Particles	253
K. NATARAJAN and P. ROTH (Duisburg, West Germany)	
High Temperature Rate Coefficient for the Reaction of O(³ P) with H ₂ Obtained by the Resonance Absorption of O and H Atoms	267
WALTER LANG (Munich, West Germany) and THIERRY POINSOT and SEBASTIEN CANDEL (Chatenay-Malabry, France)	
Active Control of Combustion Instability	281
STEPHEN J. FISCHER, BÉNÉDICTE HARDOUIN-DUPARC, and WILLIAM L. GROSSHANDLER (Pullman, WA)	
The Structure and Radiation of an Ethanol Pool Fire	291
K. ANNAMALAI and S. C. RAMALINGAM (College Station, TX)	
Group Combustion of Char-Carbon Particles	307
D. L. ZHU and C. K. LAW (Davis, CA)	
Aerothemochemical Studies of Energetic Liquid Materials: 1. Combustion of HAN-Based Liquid Gun Propellants Under Atmospheric Pressure	333
 Brief Communication	
HORST G. ADOLPH (Silver Spring, MD)	
Evidence for Rate-Determining C-C Bond Heterolysis in the Condensed Phase	
Thermal Decomposition of Polynitroethyl Compounds	343
 Meeting Announcements
